Q.IV Critically appreciate the poem given below. (12)

Love after love- Derek Walcott

The time come
 when, with elation
 you will greet yourself arriving
 at your own door, in your own mirror
 and each will smile at the other's welcome,
 and say, sit here. Eat.
 You will love again the stranger who was your self.
 Give wine. Give bread. Give back your heart
 to itself, to the stranger who has loved you
 all your life, whom you ignored
 for another, who knows you by heart.
 Take down the love letters from the bookshelf,
 the photographs, the desperate notes,
 peel your own image from the mirror.
 Sit. Feast on your life.

- Q. V** Do as directed. (12)
- a) Cite the work given below using the information in MLA 9th Edition: (04)
Novel: Time Machine, **Author:** H.G. Wells, **Publisher:** Subhas Publishing House, **Location:** Bangalore, **Year of publication:** 2008

- c) Based on the abstract given below, give a suitable title and state three objectives. (04)

Abstract:

The definition of what constitutes a healthy diet is continually shifting to reflect the evolving understanding of the roles that different foods, essential nutrients, and other food components play in health and disease. A large and growing body of evidence supports that intake of certain types of nutrients, specific food groups, or overarching dietary patterns positively influence health and promotes the prevention of common non-communicable diseases. Greater consumption of health-promoting foods and limited intake of unhealthier options are intrinsic to the eating habits of certain regional diets which have been constructed as part of dietary patterns designed to reduce disease risk. In comparison to a more traditional Western diet, these healthier alternatives are higher in plant-based foods, including fresh fruits and vegetables, whole grains and nuts, and lower in animal-based foods, particularly fatty and processed meats. To better understand the current concept of a "healthy diet," this review describes the features and supporting clinical and epidemiologic data for diets that have been shown to prevent disease and/or positively influence health. In total, evidence from epidemiological studies and clinical trials indicates that these types of dietary patterns reduce risks of cardiovascular disease and cancer.

Keywords: healthy dietary patterns; non-communicable diseases; nutrients; plant-based diets, health, disease.

Q. VI Proof-read the passage given below. **DO NOT** re-write- **Attach** this sheet to your main answer booklet. (12)

The English language **are** becoming more and more common in the **World**. As a result, **increasingly** people are dedicating time to study English as **there** second language.
