

Programme Specific Outcomes for M.A Psychology (Counselling)

Upon completion of the M.A Psychology (Counselling) Programme, students will be able to:

- Apply evidence-based interventions and prevention strategies across diverse populations and contexts.
- Demonstrate skills of interviewing, case history formulation, and report writing in mental health settings.

Programme Specific Outcomes for M.A Psychology (Clinical)

Upon completion of the M.A Psychology (Clinical) Programme, students will be able to:

- Categorize symptoms and understand the clinical presentation of psychological disorders according to DSM V.
- Use assessment tools, effectively integrate clinical interventions, and design appropriate treatment plans.
